

В основе одежды компании Anderson GEOFF лежит принцип "трех слоев" (3-layer system). Это простая и хорошо работающая система, которая рекомендуется покупателям, серьезно подходящим к выбору одежды. Одежда сделана "дышащей", т.к. нижний слой хорошо отводит влагу от тела.

Проблема в том, что наша физическая активность может сильно меняться. Нам или очень холодно или мы перегреваемся. Особенность одежды Anderson GEOFF в выравнивании температуры тела, чтобы нам было уютно и комфортно.

Layer-1

Этот слой позволяет сохранять кожу сухой, отводя влагу от тела в следующий слой одежды или наружу.

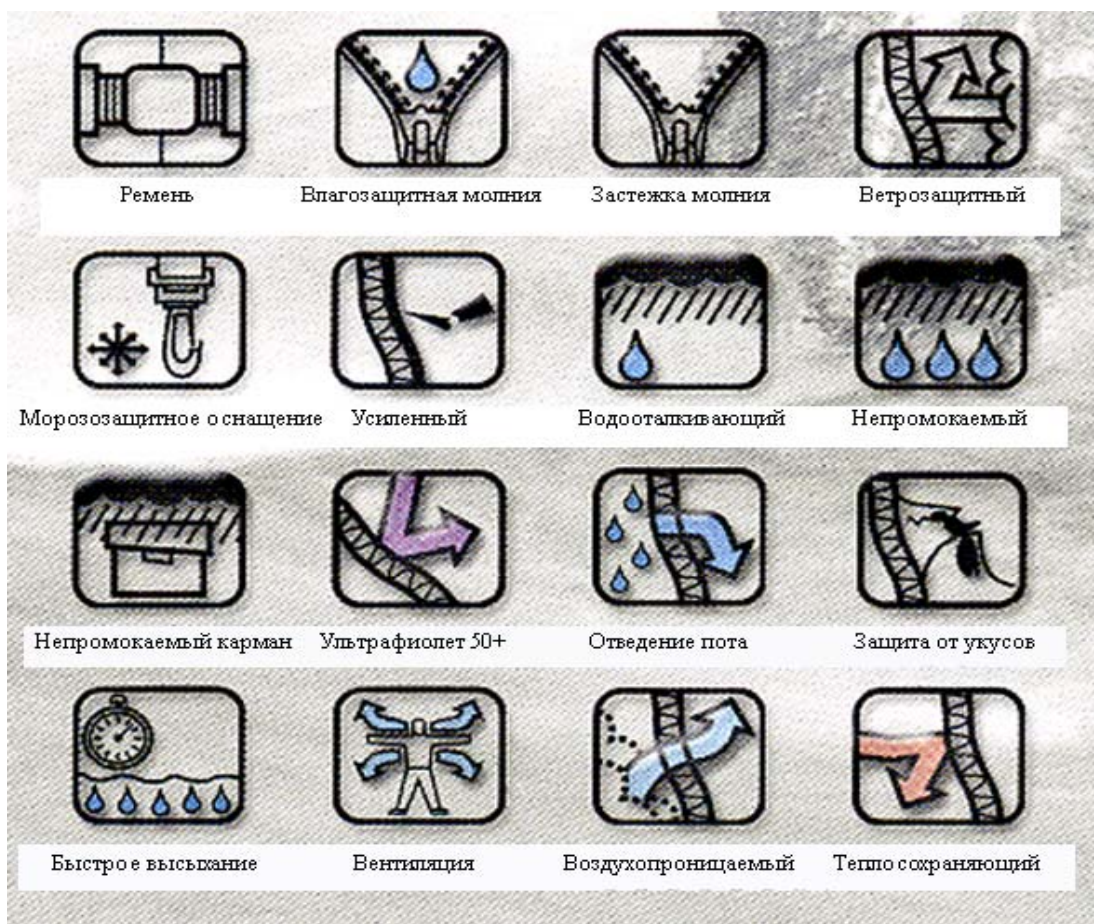

Layer-2

Этот слой собирает влагу от первого слоя и вдобавок работает как изоляционный слой. В одежде слои выбираются с различными изолирующими свойствами, что способствует регулированию температуры тела.

Layer-3

Назначение этого слоя - защитить от внешних воздействий, таких как ветер и вода.

CORDURA®

Проведенный тест показал, что ткань Cordura® отлично противостоит разрыву и протираанию.

Ткань Cordura® намного крепче, чем другие ткани:

в 10 раз прочнее хлопка

в 5 раз прочнее полистера

в 2 раза прочнее нейлона

How does CORDURA® Measure Up for Abrasion?

CORDURA® After 3,000 cycles

Nylon after 1,000 cycles

Cotton after 700 cycles

Polyester after 700 cycles

The fabrics above have been tested by the Modified Wyzenbeck abrasion test.
This is a sandpaper abrasion test measured in cycles.

Klin™

Klin™ is supplied
in a tin can.

Klin™ underwear.

The different clothing layers have to function with each other so the body's moisture can be carried away quickly and evaporate. The result is clear: increased concentration and performance.

Klin™ is suitable for low to medium level of activity. In this catalogue activities include: angling, trekking and hunting.

Only by choosing the correct inner layer is it possible to achieve the greatest level of comfort.

Functionalities:

As described in the section on the 3-layer principle, it is important to understand the function of the inner layer. Klin™ has very good perspiration transporting qualities and a slightly insulating effect. In practice, this means no loss of comfort as a result of the body cooling down.

Flat, soft seams. Exterior placement of the laundry instructions. Together these optimised details provide an increased level of comfort especially during physical activity and under stress.

Use perspiration transporting underwear all year round.

Fit:

Tight-fitting underwear series with optimised fit for increased level of comfort and freedom of movement.

Fabric:

Produced in 100 % polyester where both a normal and a micro fibre polyester thread are knit together.

Boxer shorts

Tight-fitting and very comfortable shape.

Colour: Mixed grey contrasts.
Sizes: S-XXXL. Weight: 120 gm. (M)

Shirt

Long sleeves and an elongated back piece offer extra protection of the loin. Tight-fitting.

Colour: Mixed grey shades.
Sizes: S-XXXL. Weight: 225 gm. (M)

T-shirt

Has a slightly looser fit than the shirt. Can be used as the first of three layers or as a single layer in warm weather.
Colour: mix of grey shades.
Sizes: S-XXXL. Weight: 152 gm. (M)

Trousers

Tight-fitting with ankle cuffs to ensure that the trouser legs do not slide up the leg.
The raised hip area prevents the underwear from separating at the waist when you bend over.

Colour: mix of Grey shades.
Sizes: S-XXXL. Weight: 225 gm. (M)

The System Fabric

Micro Polyester

Drying

Insulation

Sirius™

Sirius™ underwear

Sirius™ is suitable for medium to maximum level of activity. In this catalogue activities include: walking while carrying large amounts of equipment and interval activity, where at one moment you are walking out to the angling spot and at the next moment you are standing still and angling.

Functionalities:

PowerDry® Silkweight® consist of different synthetic threads which are sewn together to form a fabric with two different surfaces (bi-component). The inside layer is optimised to quickly and effectively transport the perspiration away from the body. The outside layer spreads the moisture with an unprecedented level of evaporation.

PowerDry® has a great level of breathability.

The product is 30 % more perspiration transporting than single component products and dries many times faster than e.g. cotton.

Fit:

Sirius™ has the same cut as Evaporator™ and Thermal200™. A design that ensures that the shirt and trousers stay put where they are supposed to without "crawling about" the body during activity.

Fabric:

Polartec® PowerDry® Silkweight from Malden Mills®. Patented "bi-component" construction (see illustration).

Polartec® PowerDry® is without a doubt one of the most innovative and functional fabrics ever made for wearing close to your body.

Please note that in some cases Sirius™ is supplied in PowerDry® midweight quality.

This fabric offers the highest level of comfort and performance to date.

Silkweight® "highlights"

Dries ULTRA fast. Offers a high level of protection against the sun. Comfortable silky smooth surface.

Quality:

Complaint rate: 0 %.
Colour: Black.
Sizes: XS-XXXL.

Shirt	Weight: 204 gm. (L)
Trousers	Weight: 188 gm. (L)
T-shirt	Weight: 198 gm. (L)
Boxer shorts	Weight: 122 gm. (L)

Evaporator™

Evaporator™

Performance fleece

This collection is nothing short of a gift to anglers and other active outdoor enthusiasts.

Evaporator™ is suitable for 1st and 2nd layer use.

Evaporator™ is also a suitable undergarment for "non-breathable"

clothing items like: Oilskin waterproof clothing, flotation suits, waders or the like.

Thanks to the very light construction and the incredible ability to uphold a comfortable temperature, Evaporator™ is also ideal as a middle layer during high energy activities like skiing.

Functionalities:

This special fabric is insulating and effectively transports perspiration. The brushed surface and the lightness of the fabric offer a great level of comfort.

The inside serves three purposes: it effectively moves moisture away from the body or the 1st layer and transports it to the outer layer. Furthermore, it offers effective insulation. The outer layer's structure, combined with the fabric treatment, facilitates the spread of moisture over an area considerably larger than the contact area (between skin and fabric). Hereby ensuring quick evaporation.

In comparison with other similar

fabrics, Evaporator™'s tendency to pile is minimal. This means a significantly increased lifespan and a maintaining of the functional qualities.

The construction and treatment of Evaporator™ entails that it keeps its insulating quality when it gets wet. Dirt-repelling and quick-drying. Newly developed, flat seams.

Fit:

The shirt has stretchable side panels in the vertical area of movement. This is an advantage during casting motions. An incline zipper ensures that zippers on other clothing layers are positioned differently from each other.

The trousers are shaped for active use. The knees on the overall are fitted with glide-lining so they can function unhindered against the next clothing layer.

Fabric:

Produced in new 100 % polyester microfleece with a flat woven interior and a brushed exterior.

Quality:

Complaint rate of 0 %.
Colour: Black.
Sizes: XS-XXXL.
Hood and jacket are described elsewhere.

Shirt	Weight: 288 gm. (m)
Trousers	Weight: 235 gm. (m)
Overall	Weight: 355 gm. (m)

The System Fabric

4 Evaporator™

Thermal 200™

CLASSIC

Thermal 200®

Serves one purpose: keeping you warm.

Thermal 200® is the right choice for low temperatures and sedentary activities.

Functionalities:

Malden Mills® Polartec® has the world's most advanced structure for double sided fleece, which gives it unprecedented advantageous conditions between insulating property and weight "Warmth without weight".

In comparison with other similar fabrics, Thermal200®'s tendency to pile is minimal.

This means a significantly increased lifespan and a maintaining of the functional qualities.

The product's velour construction forms microscopic air pockets that capture body heat. Thanks to the double sided fleece, Thermal 200® functions as a thermostat. The product breathes and retains heat.

Due to its structure, the fabric will uphold its insulation properties even when completely soaked. Furthermore, it is dirt repelling and quick-drying.

Note the elastic Lycra® cuffs by the feet. Newly developed completely flat seams provide a great level of comfort.

Classic® "highlights":

"Warmth without weight" means that a thinner/lighter layer offers much better insulation than traditional fleece products.

High level of breathability.

Water repelling treatment.

Quick-drying.

Unique quality that drives all other fleece products out of the market.

Fabric:

Malden Mills® Polartec® Classic 200®. 100 % polyester velour construction.

This fabric is world renowned for its ability to uphold its surface and insulation properties-even after much intensive use and washing.

Quality:

Complaint rate of 0,5 pro mille.

Colour: Light Green (Leaf Green).

Sizes: XS-XXXL.

Trousers	Weight: 275 gm. (M)

200 SERIES
Water-Repellent

Drying

Insulation

MWS™

MWS™

Covers a wide variety of use. However, the jacket has been perfected for angling. At the same time, the discreet design makes it a stylish recreational jacket.

Functionalities:

The highest possible level of breathability has been achieved by the 1st-layer principle no double membrane layer e.g. a sewn-on pocket.

MWS™ has seven pockets:

- Two easily accessible built-in horizontal front pockets, one waterproof, and one with mesh lining. These pockets are equipped with waterproof YKK® zippers.

The left pocket features a built-in pin-on-reel (See detail photo).

- Two rear pockets (hand warmers) and a front mesh pocket which function together as a ventilation system.

The pocket openings can be

adjusted according to the level of activity.

- Three inside pockets: two at chest height and one high-placed waterproof Napoleon pocket.

A newly developed closing system on the wrists. Stepless elastic adjustment. Lined with 2 mm Lycra® dressed neoprene.

MWS™ is sold in a mesh bag, which can be attached to the one upper, and two lower D-rings on the jacket for use as a practical back pocket e.g. for fish.

Fit:

The construction with added freedom of movement gives the

feeling of a jacket which is not there. During the cast, the sleeves and the shoulder are brought into motion while the rest of the jacket remains still.

Light and easy one-hand adjustment allows the swivel hood to follow the head's movements.

The cord-control is kept out of the way behind the zipper system. (See detail photo).

Fabric:

The System Fabric™ - a waterproof, breathable and durable fabric. More info on page 5.

Colour: Dark Green.
Sizes: XS-XXXL.

MWS™ Weight: 850 gm. (m)

The System Fabric

Classic Wet Type

Breathability

Waterproofing

Warmth

Wind

LWS™

LWS™

18 cm longer than MWS™. The extra length offers additional protection of the loin and rear.

When the need arises, LWS™ can be rolled up to waist height. This is an advantage for wading fishing, cycling, skiing, riding etc. This function is available without complications, due to the fact that the lengthened piece does not feature any sewn-on pockets etc.

Functionalities:

Even though it can be hard to see, the LWS™ has no less than four external pockets.

In contrast to its "sister" MWS™, LWS™ has exchanged waterproof zippers with the new "reverse" YKK® zippers which glide as easily as a knife through hot butter. This means that the pocket function can, to a further extent, be used without difficulty. An essential function during physically demanding activities.

The pockets are covered by flaps which protect them against rain and water spray.

The four horizontal integrated front pockets also function as a

ventilation system. One or more pockets can be opened/closed according to the level of activity.

Three inside pockets. Two at chest height (See detail photo) and one high-placed waterproof Napoleon pocket.

LWS™ features a newly developed effective closing system by the wrists. Stepless elastic adjustment. Lined with 2 mm Lycra® dressed neoprene. (See detail photo)

The highest thinkable level of breathability is achieved through the one-layer principle-no double membrane e.g. a sewn-on pocket.

Fit:

The cut with additional freedom of movement gives the jacket a feeling of a jacket which is not there. During the cast, the sleeves and the shoulder are brought into motion while the rest of the jacket remains still. Light and easy one-hand adjustment allows the swivel hood to follow the head's movements. The cord-control is kept out of the way behind the flap.

WS™

WS™

Developed for wading fishing using fly and spinner. The jacket is also suitable for boat fishing where the high-waist-cut makes it particularly comfortable. WS™ can also be viewed as a combination jacket e.g. for canoe and cycling trips or trekking.

WS™ is the ground pillar of the Geoff Anderson® programme. The product has been on the market for eight years.

WS™ has been on the market for so many years due to its many great functions, and its innovative combination in the choice of fabric and design.

WS™ is already a classic jacket loved all over Europe. Even the competitors love it - at least they often copy it.

Functionalities:

WS™ is reinforced with double stitching on all heavily stressed areas e.g. pockets and zippers.

The shoulders, elbows and inside of the arms are reinforced with highly water repellent monofilament. This means that the jacket weighs more or less the same, even when "wet".

WS™ has six pockets in total:

- Two waterproof spacious box

pockets. The jacket has been functionally improved and refined through more than 15 prototypes. The pockets are shape-sewn and carefully adjusted to the most common tackle box-sizes so they are out of the way during angling. By choosing the correct box-size, so the pockets always can be closed, the design and fit of the

jacket can be fully utilized while spinning or line stripping.

- Pocket with waterproof YKK® zipper, key-lock etc and a built-in pin-on-reel. (See illustration page 13)
- Easily accessible inside waterproof pocket behind the flap.
- Two pockets on the back:
- Small back pocket (26 x 18 cm) practical and highly-placed in case you need to cross e.g. a river.

1. Box pockets.
Waterproof design. Wide Velcro® keeps hold of what is inside.

2. Waterproof innerpocket.

3. Built-in Lycra® cuff.
Keeps out water and draft.

4. Multi pocket for tippet line. Hook for flashlight, hook remover, etc.
Built-in zinger.

5. Improved rod holder. Your third hand.

• Large back pocket (35 x 40 cm) with drain.

Oversized Velcro® locks and built-in Lycra® cuffs on the sleeves.

New improved rod holder: you're your third hand. Can be hidden away when not in use.

Fit:

Swivel hood with visor which follows the head's movements. Ideal if you wear a cap and glasses. Now available with 3-way adjustment. 1: inside hood. 2: outlook/angle. 3: neck opening. One-piece shoulders mean less stitches and therefore longer durability. This is an advantage when

using a backpack or other equipment with shoulder straps.

The sleeve design offers fantastic freedom for casting movements during fly and spin fishing. The inside of the sleeves are equipped with glide lining.

In our opinion, WS™ is the most versatile jacket for angling in the Scandinavian climate.

Fabric:

The System Fabric™ - a waterproof, breathable and durable fabric. In addition to rough treatment, The System Fabric™ stands machine washing which is unique for membranes.

The System Fabric™ does not delaminate - it keeps on going year after year.

In the diagram to the right you can see what to expect from the breathability in comparison to impenetrability to water, insulation and wind protection.

You can find more info on page 5 or at www.geoffanderson.com

Colours:
Light Green, Black, Green, Grey, Blue.

Sizes: XS-XXXL.

WS™ Weight: 1040 gm. (m)

The System Fabric

Classic Wet Type

Raptor™

Raptor™

Developed for angling in areas where rain and wave place great demands on the level of waterproofness.

Functionalities:

Raptor™ is enforced with stitches on all exposed/severely stressed areas e.g. pockets and zippers.

The arms are equipped with a Lycra® cuff which, together with the Velcro® shuttings (picture B), prevent water from entering when correctly closed.

Raptor™ has four pockets:

- Two large spacious front box-pockets with extra-large accordion-inserts which can expand quite a bit (see picture C)

- Waterproof inner pocket. Easy access. (Picture A).

- A large pocket on the back (35 x 40cm) with drain and YKK® zipper.

Practical hook for flashlight, hook remover, etc.

Fit:

The jacket consists of panels, which increases freedom of movement considerably.

Adjustable elastic waistline.

Swivel hood with visor which follows the head's movements. This is an advantage if you wear a cap and glasses.

Quality:

< 0.5 pro mille complaints.

Fabric:

The System Fabric™ Classic Wet Type™ in a thicker Sotina weave which is waterproof, breathable and durable. The thick fabric combined with the unique TSF™ membrane offers formidable protection.

Raptor™ can withstand as much machine washing and salt water as you can expose it to, which is a unique quality for membranes. TSF™ does not delaminate - it keeps on going year after year.

Colour: Dark Green.
Sizes: S-XXXL.

Raptor™ Weight: 862 gm. (s)

The System Fabric

Classic Wet Type

Xera™

Supplied in a compression bag.

Xera™

Developed as a light-weight suit. The fabric's superb breathability and the suit's construction offer a wide range of uses. With its minimalistic design, the jacket is also a stylish and practical jacket for everyday use. Xera™ really shows its advantages as a suit during demanding activities like running, cycling, fast-paced walks and angling.

Functionalities:

The jacket has a new and effective closing-system at the wrists with stepless elastic adjustment, lined with 2 mm Lycra® dressed neoprene.

Xera™ jacket has four pockets:

- On the front are two large waterproof incline-pockets, which are integrated in the design.
- The mesh-lined front pockets can be adjusted if air flow is desired.
- The inner lining has two zipper pockets.

The Xera™ trousers have an elastic waistline and an integrated belt with a Duraflex® buckle (See detail photo).

The trousers are lined with a light mesh.

The bottom of the trousers feature a waterproof YKK® zipper and a Velcro® cuff.

Fit:

The Xera™ suit is developed for active use. The length of the jacket is tailored for enhanced freedom of movement in the hip area.

Moveable parts such as the sleeves and knees have been shaped for a custom fit that follows the movements of the body.

The swivel hood with visor follows the movements of the head.

Ideal if you wear a cap and/or glasses.

The waist can be adjusted with one hand.

Fabric:

The System Fabric™ lamination Type 5000™ Ripstop. A light and strong nylon fabric which is ideal for light-weight products like Xera™.

The membrane has great data:
Water column pressure: > 5000 mm.
Breathability: > 5000 gm/m² pr.24h.

Colours:
Golden Green/Twisted Brown.
Sizes: XS-XXXL.

Dozer 2™

Dozer 2™

On the basis of more than 15 previous prototypes of Dozer™, we have brought together all changes and a number of new design and functionality improvements in this version two.

Dozer 2™ has no design limitations so you can use it for skiing, angling and even walking the dog.

Over the years, the Dozer™ jacket has been upgraded with many details. We thought the time was ripe for a newly designed Dozer™ which, in addition to all the well-known and successful ground principles, includes the latest knowledge about fabrics, design and technology.

The new design is a good example that practical clothing for angling also can look great.

Version 2 keywords:

Moveability. Many improvements. The weight of the jacket has been reduced with 15% by design optimising alone.

Functionalities:

Dozer 2™ has 12 pockets:

- Two inner pockets.
 - Two waterproof front pockets placed at chest height.
 - Two fleece lined kangaroo pockets, effective hand warmers.
 - Two waterproof box pockets with flaps.
 - Two ventilation pockets which are a part of the jacket's new ventilation system.
 - One large back pocket and a
 - Napoleon inner pocket hidden behind flaps.
- The hood is one-hand adjustable, and after adjustment the cord pull can be hidden behind the flap.

Fit:

New one-piece shoulders which, in addition to increased strength, offer extra freedom of movement during casts. Slide lining reduces friction against underlying clothing.

A new combination of redesigned panels on the elbows, and a bracing edge/seam (pipeline) offer you the most moveable sleeve we have ever constructed.

Two swivel panels have been attached to the hip to benefit the horizontal plan of movement.

Fabric:

The System Fabric™ - a water-proof breathable and durable fabric. Read more on page 5.

Sizes: XS-XXXL.

Urus 2™

Urus 2™

These trousers were originally developed for angling.

In addition to angling, Urus 2™ is also suitable e.g. for hunting, skiing and trekking. The reason for its wide range of use is in particular the shape, which offers great freedom of movement.

Making a better product out of the old Urus™ trousers was a great challenge, and the result turned out convincingly well.

As described below, we have integrated small and important improvements. The result is unique: a classic product that has been adapted to the spirit of the times within the area of modern outdoor clothing.

Functionalities:

Urus 2™ features a soft perspiration transporting lining which makes them functional, also without additional underlying clothing layers.

In order to make it easier to get in and out of the trousers while wearing boots, the bottom 26 cm of the legs can be unzipped (See detail photo).

An improved adjustment function makes it possible to tighten the trouser leg closely to the boot. The adjustment function can easily be removed in order to insert the trouser leg into the boot.

A total of five pockets:

- Two incline pockets now available with YKK®'s elegant waterproof zippers (See detail photo). These pockets feature a built-in snap hook for keys etc.
- Two spacious box pockets now available with rounded pocket flaps optimised with the latest generation of Velcro®.
- The right box pocket features an integrated pocket intended for multi tools.

Urus 2™ features a detachable belt and braces.

A raised back piece which offers protection against heat loss/draft.

Fit:

The new lines around the seat and knees offer additional freedom of movement.

Urus 2™ is also available with a 2mm layer of insulating and breathable neoprene - cells on the seat and knees. This model is suitable for sedentary outdoor activities.

Sizes: XS-XXXL.
Colours:
Green/Stone Grey.

Dozer™

Dozer™

A practical ¾ length jacket suitable for a multitude of outdoor activities. Dozer™ is the right choice if you want a lot of pocket space, great movability and extra protection against bad weather.

The jacket can be used all year round in all thinkable weather conditions.

Functionalities:

The inside of the jacket features a perspiration transporting and lightly insulating lining which offers a great level of comfort at moderate temperatures. During stays in cold weather, the Dozer™ Liner Jacket/Vest (included) can be zipped into the jacket as lining. The jacket can also be used with other Geoff Anderson® Fleece products.

The jacket features eight pockets:

At the bottom of the jacket are two large box shaped pockets perfect for maps, tackle boxes etc. The pocket flap has a folding layer that reduces the possibility of water entering the pocket.

Hidden under the two curved flaps at the top of the jacket are two

additional small pockets intended for a pin-on-reel for attaching a pair of scissors or a ski pass etc.

In addition to this, there is a highly-placed Napoleon pocket, two inner pockets and a large spacious back pocket.

A zipper is positioned under each sleeve as a part of the jacket's ventilation system.

Fit:

The fitted elbows and shoulders feature strong nylon reinforcements. The shoulders do not have any stitches as these can be a bother and easily wear down.

The hood is shaped to follow all the movements of the head when it is correctly adjusted.

This allows you to keep a full range of visibility when turning your head. The width of the waist line and the bottom of the jacket can be adjusted with one hand - operational elastic cords.

Dozer™ Weight: 1100 gm. (L)
Supplied with a fleece vest/jacket.

Urus™

Urus™

Developed for angling e.g. from a boat where a wet seat places great demands on the level of waterproofness. The combination of the extra thick fabric and the unique T.S.F.™ membrane offers formidable protection against wind and weather.

Urus™, "born" in 1997. Well thought out, well fabricated and thoroughly tested.

Functionalities:

All areas which are exposed or subject to stress such as belt straps, trouser legs, pockets and zippers are reinforced with double stitching. Furthermore, Urus™ features reinforcements on the knees, seat and the inside of the trouser legs.

Urus™ is also available with 2 mm integrated neoprene cells on the knees and seat.

A raised back piece protects the loin against draft and cold.

Large lined front pockets with practical snap hook for keys, hook remover etc.

On each thigh, Urus™ features a large pocket that can expand quite a bit (accordion inserts).

The left pocket even features a pocket in the pocket suitable for e.g. a multi-tool, knife or phone. This feature holds heavy tools in place in the pocket.

Urus™ features perspiration transporting lining which, in addition to keeping you dry, has insulating qualities suitable for the cold months.

Fit:

For enhanced freedom of movement, the knees, seat, waist and lining have been pleated.

Elastic waist line; can expand up to 7 cm in each size.

From the knees down, the trousers are equipped with Glide lining. Adjustable width on the bottom of the trousers makes it possible to wear anything from shoes to slalom boots.

Detachable and elastic braces with stepless adjustment.

Zinga™ Profus™

POWER DRY™

Zinga™ fishing vest.

Designed for the specialist.
The vest has countless great details and practical functions.

Functionalities:

The number, shape, size and placement of the pockets have been carefully thought out. All in all a construction that offers a well balanced and comfortable fit even when the vest is full.

Zinga™ has 15 pockets:

- Four front pockets with lining and two-way YKK® zippers.
- Four outside mesh pockets for e.g. tippet line.
- One back pocket.
- Two hand warmer pockets.
- Four inside pockets (two with mesh).

All pockets are one hand operational.

Newly developed rod holder.
Two D-rings for a wading stick.
Large D-ring for a net.
Lined and elastic shoulder section.
Prepared for integrated pin on reels.
Polartec® PowerDry™ neck area.
Tippet spool pockets.
Flypatch.
Elegant and high finish.

Fabric:

Produced in The System Fabric™ System Nylon™ a particularly breathable wind and water resistant fabric.

Zoola™

Zoola™

Developed for hunting where noiseless construction and fabrics are important factors. The Zoola™ jacket and Zoola™ trousers are a stylish and harmonic match.

A hunting suit in modern design with the newest technology, the best details and the most outstanding fabrics.

Functionalities:

Pockets (jacket):
two large deep fleece lined side pockets.
Hidden napoleon pocket that also contains a radio bag. Can be concealed when not in use.
Two large spacious box pockets with snap lock on the flap.
Spacious back pocket which is kept flat by Velcro® when not in use.
Two inside pockets with zippers.
Pockets (trousers):
two pockets with YKK® zippers.
Semi-box thigh pocket.

Temperature, ventilation and fit adjustments (jacket):
single handed adjustable neck opening, sleeve opening, waist line and bottom of the jacket.

Fit:

Meticulously produced for hunting. Exposed areas are extra reinforced.

Fitted sleeves, trouser legs and back ensure freedom of movement.

The trousers feature adjustable braces and belt.

Fabric:

The System Lamination™ 10,000: A brushed polyester type with laminated membrane.

The membrane offers 10,000 mm water column pressure, breathes 10,000 gm/m²/24 hours and stands machine washing. Furthermore, the brushed polyester is treated with Teflon® to minimise water absorption, thereby keeping the jacket's weight down. The shoulders and back are reinforced.

Snozer™

Snozer™ jacket. Snurus™ trousers.

Suitable for all seasons during high as well and low levels of activity. If the Snozer™ jacket is used for sedentary hunting, the accompanying Evaporator™ vest can be zipped into the jacket. In Europe, the jacket has even gained status as an exclusive recreational jacket.

We set ourselves one single goal without regards to fabric price and production costs: the silent hunting suit. After two years intense development work, we have not only created a silent hunting suit, we have also integrated an abundance of practical details.

Functionalities:

Pockets (jacket):

- Two hidden vertical front pockets with waterproof YKK® zippers.
- Two box pockets with magnetic closing. Inside these pockets are two zipper pockets with room for e.g. four pieces of ammunition.
- Two fleece lined hand warmer pockets.
- Waterproof Napoleon pocket.
- Key pocket with Duraflex® key hook YKK® zipper.
- Back pocket with zipper.
- Radio pocket on the left side of the chest.
- Mobile phone pocket on the sleeve. The collar is lined on the inside with Polartec® PowerDry®

for the best possible comfort. One hand adjustable waistline, collar, sleeve openings, bottom of jacket and area under the arms. YKK® zipper ventilation with Velcro® closings.

Pockets (trousers):

- Two pockets with waterproof YKK® zippers.
- Two semi-box thigh pockets, one with integrated pocket. Magnetic closing on pocket. Snurus™ features detachable braces and belt. Practical flap prevents water from getting into the Wellingtons.

Fit:

The fit is intended for challenging Pirsch hunting in all kinds of weather. Due to this fact, Snozer™ and Snurus™ are silent, light, wind/waterproof and breathable. The Snozer™ jacket consists of no less than 110 panel-units which together offer the best jacket fit we have ever constructed.

Fabric:

Extremely silent brushed polyester with Teflon® treatment (outside layer).

Vent-X® elastic wind/waterproof and breathable lining.
Scottish produced.
10,000 mm water column pressure.
10,000 gr/m²/24 hours.
This advanced construction is the only way to achieve silence. An added value is the reduced number of tapings.

Zoantro™

Innovative modern design with nice details. Zoantro™ was developed for all round hunting. Due to the Cordura® reinforcements, the trousers can withstand any form of vegetation.

Functionalities:

The jacket's inserted pleats and fitted sleeves, hips and back offer freedom of movement. The jacket features ten pockets: Two deep fleece lined side pockets with YKK® zippers. Two hidden waterproof vertical pockets with silent magnetic closing. Hidden waterproof deep Napoleon pocket, that contains a radio bag. The radio bag can be hidden away when not in use. Two horizontal pockets with practical silent magnetic closing. Spacious back pocket. Two inside zipper pockets. One hand adjustable neck opening, waist line and bottom of the jacket.

The Zoantro™ trouser's S-shape offers a high level of comfort. In order to make getting in and out of the pants easier, while wearing boots, the bottom 27 cm of the trouser legs can be unzipped. An improved ankle adjustment makes it possible to tighten the trouser legs tightly around the boots. The adjustment can easily be removed, if you want to insert the trouser leg into the boot. Two elegant, newly thought-out semi-box pockets with waterproof YKK® zippers. Two side pockets with YKK® zips. Detachable belt and braces.

Fabric:

Zoantro™ is produced in The

System Lamination 10,000™ - a carded polyester with a laminated membrane that offers 10,000 mm water column pressure, breathes 10,000 g/m²/24 hours and stands machine washing. The product is treated with Teflon® to minimise water absorption, thereby keeping the jacket's weight down. Shoulders, back and legs are reinforced with Cordura® nylon.

Sizes: XS-XXXL.

Colours: Green, Golden Brown.

Jacket Weight: 1290 gm. (m)
Trousers Weight: 996 gm. (m)
Fleece lining, and hood available

Dry Lamination

Zoon™

Zoon™ jeans.

These jeans are so versatile that they can be worn in the warmth of a cabin and directly out in the pouring rain.

A pair of versatile and elegant trousers in jeans shape. Wind/waterproof and breathable fabric. Zoon™ are developed for active outdoor life in the changing Scandinavian climate.

Functionalities:

Zoon™ features eight pockets:

- Two large spacious side pockets.
- Two coin pockets with YKK® zippers for safe storage of small necessary objects.
- Two spacious semi-box pockets with flaps and Velcro® closings.
- Two back pockets with YKK® zippers. Hidden behind flaps.

Soft perspiration transporting lining that feels comfortable close to the skin.

In contrast to most waterproof trousers, Zoon™ has no finishes

with straps and buckles on the trouser legs. For this reason the length of the trouser legs can be adjusted.

Fit:

Elastic waist line (+6 cm). Deep pleats on the front, well-fitting and spacious knees and seat area ensure excellent comfort in walking, sitting as well as lying position.

Equipment:

Zoon™ features a belt with step-less adjustable Duraflex® buckle.

Waterproof YKK® zippers. Back pockets with flaps and Velcro® closings.

Fabric:

The System Fabric™ - A waterproof breathable and durable fabric. Read more on page 5.

Sizes: XS-XXXL.
Colour: Dark Green.

Zoon™ Weight: 560 gm. (m)

Classic Wet Type

Zebu™

Zebu™

Zebu™ is developed primarily as an overtrouser. The idea is that you will be able to get your Zebu™ trousers on and off even under challenging conditions. Zebu™ has shown its excellence especially for boat fishing. The raised waist and back piece offer protection against draft and moisture, whether you are in a boat, on a backpack stool, by the lakeside or hunting. Zebu™ unites simplicity and performance. An angler's dream.

Light comfortable overtrousers in waterproof and breathable fabric.

Functionalities:

Zebu™ has a highly cut waist line which offers protection against draft and water coming in.

Stepless adjustable braces with Velcro® seals.

The waistline can be adjusted with an internal cord-pull practically placed in a mesh pocket.

Soft perspiration transporting lining which also makes the trousers functional without underlying clothing layers.

Zebu™ features a total of four pockets:

- Two spacious discrete side pockets with waterproof YKK® zippers.
- Two inside pockets in thick mesh with YKK® zippers for practical and safe storage of keys etc.

Extra long waterproof YKK® zippers (30 cm) at the bottom of the trouser legs.

Newly thought-out elastic ankle buckles which can be closed around the boots for protection against unnecessary loss of heat and wave splashes.

Fit:

Well-designed and spacious knee and seat areas offer excellent comfort while sitting down. Front closing with flaps and waterproof YKK® zipper offers protection

against water coming in while sitting down.

The seat area is reinforced and at the same time offers great protection against water penetration from the boat seat etc.

Fabric:

The System Fabric™ - a waterproof breathable and durable fabric. The fabric's breathability is great. You can go directly from 0°C to indoor temperature without loss of comfort. The product functions as a thermostat.

Sizes: XS-XXXL.
Colour: Dark Green.

F6™ & Feco™

Photo: CQJ.dk

F6™ Fleece Jacket.

Can be used as an elegant jacket or as an unrivalled middle-layer.

F6™ can be zipped into certain models of the Dozer™ jacket. The combination of F6™ as fleece lining offers optimal protection and can be used in the most extreme weather conditions.

Functionalities:

Slide-lining in the sleeves and upper part ensures minimal friction during e.g. casting movements. One hand adjustable waistline. Two side pockets and one inside pocket with YKK® zippers.

Fit:

If F6™ is used as the second layer, the jacket must be worn close to the body in order to achieve the best possible insulation.

Fabric:

Malden Mills® Polartec®200 Series Double Velour fleece with extreme insulating properties.

F6™ Weight: 720 gm. (m)

Feco™ Fleece jacket.

Functionalities:

In addition to offering great insulation, Feco™ can be used as a good-looking fleece jacket. Feco™ features Polyester lining which offers a high level of comfort and and great movability.

Two side pockets and inside pocket with YKK® zippers.

Application:

Same application as F6™.

Fit:

If Feco™ is used as the second layer, the jacket must be worn close to the body in order to achieve the best possible insulation.

Fabric:

One-sided anti-pilling fleece 200.

Sizes: XS-XXXL

Colour: Olive green.

Feco™ Weight: 710 gm. (m)

The System Fabric

Anti pilling fleece

Drying

Insulation

G4™ & Evaporator™

G4™ Fleece jacket.

A really nice fleece-jacket for use in cool weather conditions. The jacket unites functionality and design in a very delicate way. These facts are the reason why e.g. the Danish police in Iraq use G4™.

Functionalities:

The slide lining in the sleeves offers great movability.

The waistline can be adjusted so the jacket fits tightly, thus reducing loss of heat. The jacket features two side pockets with YKK® zippers and two inside pockets.

Fabric:

Malden Mills® Polartec®200 Series Double Velour fleece with extreme insulating properties. Perspiration transporting polyester lining offers a high level of comfort.

Sizes: XS-XXXL.

Colour: Mix of Grey shades.

G4™ Weight: 820 gm. (m)

Evaporator™ Fleece jacket.

The fabric's lightness and its amazing ability to uphold a comfortable temperature make Evaporator™ ideal as the 2nd and 3rd layer during high levels of activity.

Functionalities:

The special fabric construction is both insulating and extremely perspiration transporting.

The brushed surface and the fabric's lightness offer a high level of comfort.

Fabric:

100 % polyester. The outer layer's structure, combined with the fabric treatment, facilitates the spread of moisture to a considerable area. Hereby ensuring quick evaporation.

Sizes: XS-XXXL.

Evaporator™
Weight: 440 gm. (m)

The System Fabric

4 Evaporator™

Daze™

Daze™ waterproof fleece.

Produced for active outdoor life under cool Scandinavian skies. Daze™ is a good and sporty choice e.g. for hunting. New advanced design.

A thick waterproof and breathable jacket suitable for hunting, angling and other activities.

The jacket is very special; modern and "retro" at the same time.

Functionalities:

Daze™ features four pockets:

- Two hand warmer pockets, lined with fleece.
- Two large deep waterproof vertical pockets with waterproof YKK® zippers.

Temperature, ventilation and fit adjustment:

Daze™ features single-hand adjustment of neck opening and

bottom of jacket.

Short elastic Evaporator™ fleece cuffs.

Daze™ is silent during movement.

A layer of brushed polyester has been attached to the shoulder area. This offers a non-slip base e.g. for your weapon.

Fit:

Elastic panels under the arms and a shooting pleat offer a freedom of movement never seen before in a thick jacket.

The special elastic accordion

shooting-pleat on the back of the shoulder area facilitates quick silent and trouble-free movement in firing position and during casts while spin or fly-fishing.

Fabric:

Daze™ is based on a combination of thick "retro-plush" fleece, stretchable Evaporator™ side panels and wind/waterproof and breathable quality dropliner.

Sizes: XS-XXXXL.

Colour: Green/Black.

The System Fabric

Fleece Drop Liner

Daze™

Weight: 930 gm. (s)

Griffon™

Griffon™ windproof fleece jacket.

*Elegant all round jacket with excellent breathable and wind-breaking properties.
Griffon™ can stand quite a rain shower.*

A fleece jacket that can be used for a wide range of outdoor activities.

Functionalities:

The jacket features Nylon Teaftea® reinforcements on the shoulders, forearms and chest, which reduces wear caused by backpack use. At the bottom of the jacket you will find a windscreen, which can be adjusted so the insulation property can be regulated.

Griffon™ features six pockets.

Two vertical front pockets with YKK® zippers.

Two side pockets with YKK® zippers (hand warmers).

Two inside pockets with YKK® zippers. One in thick mesh so the contents can be seen.

Elastic sleeve openings with Lycra® lined neoprene reduce water penetration.

Single-hand adjustable neck opening.

Fit:

The shoulders and sleeves have been delicately rounded so the jacket follows the movements of the upper body. Optimised design for active use.

Fabric:

Produced in The System Fabric™ Laminated fleece. Double velour anti-pilling fleece which is windproof and breathable and has insulating properties.

The high quality of fleece and delicate structure stays intact even after many machine washes.

The fleece and lamination are very stretchable which increases durability.

Sizes: XS-XXXL.
Colour: Black.

Daze™ Weight: 950 gm. (xl)

Fleece Drop Liner

ZipZone™

ZipZone™

Nearly anywhere you find yourself in the world, whether you are angling, hunting, hiking, travelling, etc. ZipZone™ trousers will be the ideal choice. These trousers are still, after more than five years on the market, one of our greatest successes. Price and quality qualify ZipZone™ for a first place in the category of trousers with detachable legs.

Functionalities:

The foundation of the ZipZone™ trouser's construction is that the trouser legs can be zipped-off. The two-in-one principle makes them very suitable in cool as well as warm weather, under many different skies.

The trousers offer optimal protection against sun, insects and thicket. Even after rain-showers the trousers will dry quickly. ZipZone™ can be used in combination with Sirius™ or Klin™ in low temperatures.

ZipZone™ features seven pockets:

- Two incline pockets.
- One Velcro® coin pocket.
- Two back pockets with YKK® zippers.
- Two side pockets.

Fit:

The fit ensures great freedom of movement and the practically placed box-shaped side pockets make it possible to store even large objects without feeling uncomfortable. The back pockets feature zippers for safe storage.

The thick nylon belt makes it possible to attach moderately heavy tools or a drinking bottle.

Maintenance:

We recommend machine washing at 30°C. Wash the trousers inside out. Follow the instructions in the trousers. The trousers should be washed more frequently if they are exposed to saltwater. Sunlight bleaches the fabric.

Always remember to dry the trousers completely after use. Always wash trousers and trouser legs at the same time.

Fabric:

The System Nylon™ 100 % Nylon. The many functional features include: Extreme durability, breathability, light weight, and the ability to dry in no time.

Note that ZipZone™ trousers are suitable for shortening.

Quality:

Complaint rate: < 0.5 pro mille.

Sizes: XS-XXXL.

Colours: Green, Black, Grey and Sand.

ZipZone™ Weight: 383 gm (M)

HikeZone™

HikeZone™

The low weight and the fit of the trousers make them comfortable to wear in a temperate climate for a number of activities, hereunder travelling under warm skies.

In low temperatures, we suggest combining HikeZone™ with Sirius™ underwear.

The trousers are so neat, light and airy that they are hard to do without on the road as well as in everyday life.

These trousers are used by the Danish police force.

Functionalities:

The short dry-time is an essential property. HikeZone™ features a brushed surface which, when it gets wet, effectively absorbs moisture and quickly spreads it to a larger area. In this way the dry-time is reduced significantly.

Even after rain-showers the trousers will dry in no time.

Non-iron.

The trousers are reinforced with double fabric layers on the knees.

A thick adjustable belt that can carry tools or a drinking bottle.

HikeZone™ has a total of eight pockets:

- Two vertical pockets, one featuring a coin pocket.
- Two side box pockets with Velcro®.
- Two back pockets with YKK® zippers, flaps and Velcro® closings.
- Inside safety pocket for notes etc.

The light weave ensures effective breathability.

Fit:

The knee, waist and seat-cut ensures great movability.

Note that HikeZone™ trousers are suitable for shortening.

Fabric:

Polybrush™ - a very thin and light polyester weave with great durability.

Sizes: XS-XXXL.

Colours: Green, Grey and Sand.

HikeZone™ Weight: 334 gm (M)

Huntus™

Huntus™

Equally suitable for fishing trips, the forest and hunting. Huntus™ construction makes them suitable for dry as well as humid climates. Ideal travelling trousers.

New light weight trousers for a wide range of uses.

Functionalities:

Huntus™ features six pockets: Two incline pockets with YKK® zippers integrated into the design of the trousers.

Two semi-box thigh pockets with flaps, Velcro® and YKK® zippers. The design ensures that the front of the pocket does not catch twigs or similar items.

The back of the pocket, on the other hand, features a practical accordion pleat which offers extra room.

Two back pockets with YKK® zippers, hidden behind practical flaps.

Stepless adjustable belt with Duraflex® buckle.

The knees and seat are reinforced with 100 % nylon, which offers great protection.

Fit:

Huntus™ are spacious and represent a new and alternative way of constructing trousers. Instead of the traditional way of having one trouser leg made of two pieces of fabric, Huntus™ is made of eight panels. In addition to this, the knees and seat area feature inserted pleats.

Imagine how much freedom of movement this innovation offers.

Maintenance:

We recommend machine washing at 30°C.

Wash the trousers with the inside out.

Follow the instructions in the trousers.

The trousers should be washed more frequently if they are exposed to saltwater. Constant sunlight bleaches the fabric.

Always remember to dry the trousers completely after use.

Fabric:

The System Fabric™ NC is a 30/70 combination of waxed cotton and nylon. The cotton's nice cool feel against the skin, and the durable and protective nylon has resulted in a pair of exceptional leisure time trousers.

A special wax treatment has removed the cotton's natural ability to absorb fluid-which means that only the positive properties of the cotton are maintained.

The trouser legs can be shortened.

Sizes: XS-XXXL.

Colour: Dust Green.

Mahi Mahi™

Mahi Mahi™

Mahi Mahi™ shorts are a combination of hiking shorts and bathing shorts. This combination makes it possible to further reduce the load of your pack while travelling.

Functionalities:

Two-in-one function: shorts and trunks. The fit is optimised for additional freedom of movement. Whether you are hiking or swimming.

The fit and the light and extremely durable nylon fabric make Mahi Mahi™ shorts very comfortable to wear. Furthermore, the light nylon weave dries very quickly.

Mahi Mahi™ features seven pockets.

- Two incline pockets.
- One coin pocket.
- Two back pockets with YKK® zippers.
- One side pocket with YKK® zipper.
- One inside safety pocket which is especially suitable for storing notes etc.

Integrated briefs in soft elastic Lycra®, as well as mesh in all pockets, prevents air from accumulating in the shorts when you are swimming.

Elastic adjustable belt and cord pull around the waist ensures that the shorts stay in place.

Maintenance:

We recommend machine washing at 30°C. Wash the shorts with the inside out. Either with a suitable detergent or simply in clean water.

If Mahi Mahi™ frequently are subjected to salt and chlorine water and sun, in time the fabric will become bleached and/or change tint.

Pay special attention to the fact that black can end up looking reddish after intense exposure to sunlight or use in chlorine water.

Fabric:

The System Nylon™ consists of 100 % nylon. This fabric offers many great functional properties: great durability, breathability, low weight and the quality of drying quickly.

The integrated briefs are produced in 100 % Lycra®.

Quality:

Complaint rate: < 0.5 pro mille.

Colours: Sand, Black and Green.

Sizes: XS-XXXL.

Mahi Mahi™ Weight: 189 gm (L)

Guereza™

Guereza™

A youthful and functional design with great practical properties. For active use such as angling, trekking, travelling as well as everyday use.

This shirt is also suitable when you wish to reduce the weight of your pack.

The Guereza™ shirt is also used by several European police forces.

Functionalities:

Guereza™ is quick-drying, non-iron and easy to pack.

The two chest pockets have YKK® zippers for safe storage of small objects.

The pockets are mesh lined which ensures a high level of breathability.

The Guereza™ fabric offers excellent UV protection.

The shoulder area is coated with cool mesh lining.

There are no irritating labels in the neck.

Fit:

The loose fit ensures great freedom of movement and feels cool under warm skies.

Fabric:

Cashua Fabric consists of
65 % Polyester
35 % Cotton.

With this combination we have gained the advantages of both fibres.

Cotton is commonly known as a shirt fabric. It has nice and soft feel.

The polyester ensures a high level of breathability, is perspiration absorbing as well as quick-drying, and feels comfortable against the skin.

Maintenance:

Guereza™ is non-iron. It is important for the shirt's look that it is placed on a hanger immediately after washing.

Colours:

Sand, Grey, Green, Blue.
Sizes: XS-XXXL.

Guereza™ Weight: 180 gm (S)

PolyBrush™

PolyBrush™ Ventilation shirt.

The PolyBrush™ shirt features a number of exceptional qualities that really show their worth in high temperatures and high air humidity. Under strenuous conditions, you will often perspire quite a bit. As soon as you take a break, the shirt will instantly dry and once again feel comfortable.

PolyBrush™ has shown its versatility all over the world for civilian as well as professional use. The angler, the expatriate police officer in Iraq and the elite soldier all benefit from the shirt's unrivalled properties on a daily basis.

Functionalities:

PolyBrush™ offers high UV protection (+50).

The shirt's ventilation system consists of a large mesh opening on the back as well as two small ones under the arms with YKK® zippers.

The combination of these openings and the fabric's breathability allow for a large cooling flow of air and quick drying. In addition to this, the shirt is equipped with a perspiration transporting mesh lining,

which effectively spreads the moisture and also helps contribute to a quicker evaporation.

The sleeves can be rolled up and secured with a strap.

One of the front pockets features a YKK® zipper and is suitable for safe storage of valuables.

In comparison to its thin structure, the PolyBrush™ fabric is very durable. It allows for rough treatment and will retain its look even after numerous washes and much use. The shirt is easy to pack, light and non-iron, which makes it suitable for those who wish to reduce the amount of clothing and weight of their pack. PolyBrush™ is so finely woven that insects have difficulty biting through it.

Fit:

The loose fit ensures great movability and comfort.

Fabric:

100 % polyester.

A thin and light weave with a brushed outside effectively absorbs and spreads out the moisture. The moisture will dry quickly as it spreads across the brushed surface. Despite the light structure, the durability is of the highest quality.

This fabric does not change character significantly even after years of use.

Colours: Cement, Grey, Green, Blue. Sizes: XS-XXXL.

Polybrush™ Weight: 350 gm (M)

The System Fabric

Zulo™

Zulo™

Zulo™ fulfils most of the requirements for a shirt intended for active outdoor life. Why should you not look good at the same time.

Try the comfort and new fit for yourself!

Functionalities:

Zulo™ is a practical shirt produced for anything from warm summer weather to subtropical climate.

The Zulo™ fabric is treated so it creates minimal contact with the skin. For this reason, the shirt always feels comfortable and cool.

Zulo™ features two front pockets with YKK® zippers. In this way, all your belongings will stay in your pocket, even when you bend over to pick up the catch!

Zipper and front buttons are elegantly hidden behind the outer fabric.

The shoulder area is coated with a cool mesh lining. No irritating labels/washing instructions in the neck.

Fit:

The back has been pleated for enhanced freedom of movement. Furthermore, the fabric is stretchable.

Fabric:

2% Spandex

31% Rayon
67% Polyester

Zulo™ is produced in an extremely breathable and durable fabric which stands machine washing (30°C).

The fabric is non-iron and anti-pilling.

Colours: Sand with a touch of Valrona.

Luxury scarf in soft double velour. Malden Mills® Polartec® 200 DWR. Sizes One-size.

SideZone™

Photo: Nette Levernann

SideZone™ trousers

To develop a pair of skiing trousers was initially considered as a diversion from our original line of work, but the successful use of Urus™ for skiing as well as our own passion for this sport, provided the necessary inspiration.

SideZone™ is firstly for alpine skiing. In full length on the outside of the legs runs a two-way zip, which makes it possible to open up completely. It is therefore easier to put the trousers on and take them off, when you are wearing boots.

At the bottom of the trouser leg is a snow cuff in rip-stop nylon, which prevents snow or moisture from passing. A strong and non-slip elastic has been stitched onto the snow cuff to give a better grip around the boot.

The lining of the trousers is soft and sweat-transporting, which increases comfort. Usually a combination of SideZone™ and a pair of sweat-transporting trousers

(Klin™ or Sirius underwear™) will be perfect for skiing.

On knees, seat and ankles, reinforcements have been attached to reduce wear and tear. Around the knee is a pleat to improve the fit and provide better mobility.

To ensure the trousers stay put there are braces with variable length and buckles at the side to adjust/reduce the width. The option to tighten the trousers close to the body combined with the extended backpiece, prevents snow from getting through.

For safe keeping of valuables, there are two side pockets with zips. Above each pocket is a small ring

where a skipass can be attached and secured inside the pocket while skiing.

4 Classic Wet Type

Wear
Third Eye™

Third Eye™

Third Eye™ offers an incredibly wide product range for the price; which means that you do not have to spend a fortune on polarised sunglasses. If you are not familiar with Polaroid®, a new world is about to open itself to you.

Anglers, and other people who enjoy water/snow related leisure time activities, will benefit from the filtration of reflective surfaces. The Polaroid filter removes reflection and enables you to see through the surface of the water.

Third Eye Wear™ can also be used, with great advantage, for winter sports like skiing and ice fishing.

Moreover, Third Eye Wear™ protects your eyes against many of the harmful ultraviolet rays.

In each product range, you will find 6 different frames each available with yellow or copper* lenses.

Yellow lenses are a "must" for anglers; whether or not the sun is shining, you have to be able to see through the water surface to get the full benefit.

The yellow lenses make out the contrasts very sharply and can be used to great advantage in cloudy weather. In addition to this, yellow lenses are recommendable for driving and hunting/shooting.

What is special about these yellow lenses is the fact that they can be viewed as a light and contrast enhancer.

In addition to protecting your eyes against harmful UV rays, copper* lenses make it possible to see through the surface of the water. Copper* lenses offer exceptional protection against powerful light and are particularly suitable for activities in strong sunlight.

We recommend one pair of glasses with yellow lenses, as well as a pair with copper* lenses. This combination will cover most people's needs, and the "world" will look completely different with Third Eye Wear™.

*Copper = Orange/brown lenses.

Sirius 2

Sirius 2™ Нижнее белье

Версия 2 подходит для максимального уровня активности.
Эффективно, когда занятие связано с перерывами в активном движении.

Ничто не высохнет так быстро как этот материал Polartec® !

Ткани PowerDry® и Silkweight® содержат различные синтетические нити, которые сотканы таким образом, что ткань имеет две различные поверхности (bi-component). Внутренний слой быстро и эффективно отводит пот от тела. Наружный слой испаряет влагу с невероятной скоростью.

На 30% больше отводит пота, чем однокомпонентные изделия и высыхает во много раз быстрее, чем аналогичные из хлопка.

Ткань:

Polartec® PowerDry® Silkweight from Malden Mills®. Запатентованная формула "bi-component".

Polartec® PowerDry® без сомнения одна из самых инновационных и функциональных тканей когда-либо созданных для нижнего белья. На сегодня эта ткань предлагает высочайший уровень комфорта.

Silkweight® "highlights"

Сверх быстрое высыхание.

Обеспечивает высокий уровень защиты от солнца(93-95 %)

Приятная гладкая и шелковистая поверхность.

Dozer 3™

При создании новой куртки Dozer™ в дополнении ко всем хорошо известным основным принципам были использованы последние знания в области тканей, дизайна и технологии.

Новый дизайн - это пример, как практичная куртка для рыбалки великолепно смотрится.

Version 3:

Подвижность. Много улучшений.

Вес куртки уменьшился.

Укрепляющие вставки Cordura®

Dozer 3™ имеет 12 карманов:

1. Два внутренних кармана.
2. Два водонепроницаемых наружных кармана на груди .
3. Два кармана на флисовой подкладке, хорошо согревающие руки.
4. Два кармана защищенных от дождя с клапанами.
5. Два вентилируемых кармана, которые являются частью новой вентиляционной системы куртки.
6. Один большой карман сзади.
7. Влагозащитный внутренний карман за отворотом.
8. Капюшон, регулируемый одной рукой и, после регулировки, шнур может быть убран за клапан.
9. Новый покрой плеч из одной детали в дополнении с увеличенной прочностью предлагает свободу движений при забросах.
10. Новый дизайн деталей на локтях делает более подвижный рукав. Большая часть рукава на локтях сделана с тканью Cordura®.

Размеры: XS-XXXL

Цвета: Зеленый/Серый, Коричневый/Серый

Вес: 1100gram.

New MWS 3™

Эта куртка предусматривает широкие варианты использования, однако она создавалась как идеальная для рыбалки. В то же время, строгий дизайн делает ее шикарной курткой для активного отдыха.

Ткань:

System Fabric™ – это водозащитная, дышащая, прочная ткань.

Конструкция куртки дает свободу движений и ощущение, что ее нет.

Цвета: зеленый/серый - коричневый/серый

Размеры: XS-XXXL.

Вес: 788 г.

LWS 3™ 2 layer jacket

Эта куртка такая лёгкая, удобная и функциональная, что Вы не чувствуете, что она надета.

Защита от любых капризов погоды.

Подходит для рыбалки и активного отдыха.

У куртки 7 карманов, каждый из которых имеет свое предназначение.

Два боковых утепленных кармана и два передних кармана вместе служат системой кондиционирования куртки.

Наружные карманы закрыты клапанами, защищающими от дождя и водяных брызг.

Левый нагрудный карман имеет встроенный "pin on real"

По сравнению со своей "сестрой" MWS™, LWS 3™ имеет водозащитные реверсивные молнии YKK®, которые скользят так легко, как нож через горячее масло.

Покрой куртки дает свободу движений и чувство легкости. Во время броска у куртки двигаются только детали рукава и плеча.

Когда возникает необходимость укоротить LWS 3™, низ куртки может быть легко поднят к талии. Это - преимущество для того, чтобы ходить во время рыбалки, при езде верхом и на велосипеде, при хобби на лыжах и т.д.

Эта функция доступна без осложнений, т.к. удлиненная часть специально скроена и не имеет карманов

Съемный капюшон следует за движениями головы, легко регулируется одной рукой.

Ткань:

System Fabric™ - инновационный материал, обеспечивающий великолепную защиту в любую погоду. Материал прочный и стойкий с превосходной защитой от воды, дышащий и способный удерживать тепло.

T.S.F это идеальный трехслойный материал для любых занятий на открытом воздухе, особенно при повышенной физической активности.

T.S.F отводит избыток тепла и влаги при сохранении водозащитных свойств, обеспечивая вам комфортные условия.

Рукава на локтях усилены тканью Cordura®

Цвет: коричневый/серый.

Размеры: XS-XXXL.

Вес: 875 г (M):

Jabba™ рубашка три в одном

Polartec® 200 DWR с подкладкой Klin Diffusion™.

Капюшон и вставки с боков - микрофлис.

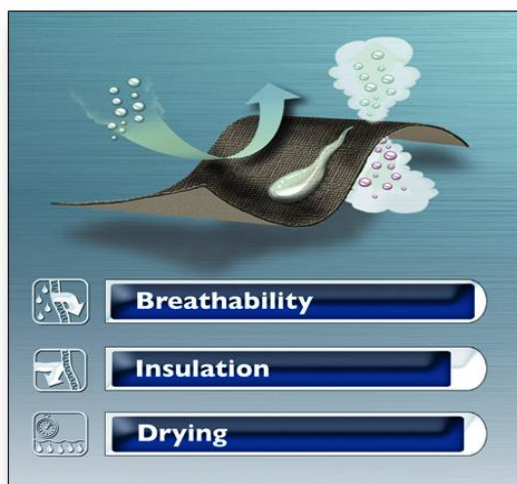

Рубашка Jabba™ объединяет свойства термобелья и утепляющие свойства Polartec® Fleece.

Для получения максимального эффекта при ношении этой рубашки важно, чтобы Вы правильно выбрали размер. Рубашка должна плотно облегать без ограничения в движении. Если Вам впору размер Large куртки Geoff Anderson®, то для вас подойдет размер Large Jabba™.

- Сохраняет тепло, оставаясь легким без применения большого числа традиционных утепляющих тканей.
- Высокая способность "дышать" поддерживает комфорт при любых занятиях.
- Быстро высыхает, сводя к минимуму потери тепла..
- Прочная; переживает другие флисовые ткани.
- Допускается машинная стирка..
- Универсальная; подходит для широкого круга занятий .

Особенность рубашки Jabba™ - сочетание мягкой подкладки (Klin Diffusion™), отводящей пот, с дополнительным слоем из Classic Polartec 200®.

Jabba™ это функциональное нижнее белье и теплозащита в одном. Носить эту одежду предполагается прямо на тело без другого нижнего белья.

1. Капюшон Evaporator™. Вполне удобен для любых занятий на свежем воздухе.
2. Регулирование шнуром.
3. Усиление на локтях.
4. Эластичные манжеты и талия.
5. Боковые вставки Evaporator™. Очень легкие и растягивающиеся.
6. Плоские швы, мягкие, не раздражающие кожу.
7. Подкладка из ткани Klin Diffusion™ сохраняет Вас в комфорте.
8. Прекрасно подходит для активного использования.

Как это работает:

Polartec® Classic - это стандарт для одежды легкой, теплой и дышащей. Этот оригинальный флис дает несравненное качество и прочность.

Как Polartec работает?

Микроструктура 100% велюр-полиэстера состоит из воздушных полостей, которые удерживают воздух и сохраняют тело теплым. В отличие от дешевых флисовых тканей Polartec® Classic не теряет способность сохранять тепло и после многократных стирок.

Сочетание нижнего белья klin Diffusion™ и Polartec Classic® обеспечивает оптимальный уровень сохранения тепла при активных занятиях на свежем воздухе.

Носите Jabba™ под любой курткой ...

Возможные размеры: от XS до XXXL.

Цвет: Черный.

Вес: (Size large) 528 gm.

New: Morada™ с длинным рукавом

Рубашка Morada™ пошита из многофункциональной ткани *Шелковый ветер*™ (15% Полистер и 85% Нейлон).

Шелковый ветер™ это хорошо дышащая ткань, имеющая высокую защиту от ультрафиолета.
