В 1877 конструктор «Мустада» и фабричный менеджер Матиас Топп построили первую в мире полностью автоматическую машину для изготовления рыболовного крючка. Это явилось началом становления «Мустада» как самого крупного в мире производителя рыболовных крючков. «Мустад» предлагает более 60 000 различных образцов рыболовных крючков, а за всю свою историю «Мустад» изготовил больше 100 миллиардов рыболовных крючков, которые были проданы во всем мире. ULTRALINE

THOR

THOR is a co-polymeric polyamide monofilament fishing line engineered to have very high knot and linear breaking resistance. The clear colour gives it a dycroic (camou) effect, which means that the line adopts the same colour as the surroundings and becomes practically invisible in the water. Excellent tippet material for any kind of fishing, both in freshwater and saltwater.

Available in spools of 50 m, individually packed in cardboard peg boxes. Outer packaging: transparent PVC containing 10 spools.

THOR Fluorocarbon Tip

THOR Fluorocarbon Tip is a 100% fluorocarbon monofilament fishing line designed to be used as tippet material, especially when using saltwater techniques.

Fluorocarbon has a low refraction index and is virtually invisible in water. Contrary to nylon, fluorocarbon is waterproof, which means that it doesn't lose resistance even after a long time in the water. Since the specific weight of fluorocarbon is heavier than water, the line sinks.

Available in spools of 40 m or 50 m, individually packed in cardboard peg boxes. Outer packaging: transparent PVC containing 10 spools.
