

> Base Mixes

Carp's

Contains 50% protein for catching big fish. Developed by the Mahin brothers, this mix can be coloured and flavoured to suit the water.

	Ref.
1 kg	00141 /10
2,5 kg	00142 /8

Bird food mix

This yellow seed mix is a blend of highly digestible seed products, which is bound together using a selection of high quality vegetable proteins and Semolinas with natural spices increasing attraction. Adding flavours, essential/complex oils plus 1-2 teaspoons per pound of spice appetite stimulator, will enhance performance.

	Ref.
1 kg	25001 /10
2,5 kg	25002 /8

Robin red Bird Food mix StarBaits

Based on the Bird Food Mix but enhanced further by adding the highly acclaimed Robin Red that also gives this bait a very desirable deep red colour. Designed for all year round use due to its digestibility. Naturally spicy bait that can be complemented by adding Star Baits Special Sweet cinnamon flavour mixed with essential oils, coriander or black pepper with Standard spice or Indian spice from the complex oils.

	Ref.
1 kg	25081 /10
2,5 kg	25082 /8

Fish Meal mix

Pungent oily fish base consisting of several fishmeals all of which are highly attractive to carp. Once again great attention has been paid to the digestibility of the mix making it year-round bait. As with all of our bases, extremely easy to roll. To add to the performance we recommend adding Star Baits appetite stimulator, Starmino and Star Baits Seafood attract at the recommended levels per pound of base mix.

	Ref.
1 kg	25021 /10
2,5 kg	25022 /8

Protein mix

Containing approx. 60% protein, this mix exclusively contains the highest quality lactic derivatives, vegetable proteins and semolinas. Richer than the carp mix, it is ideal for longer sessions and colder periods.

	Ref.
1 kg	25041 /10
2,5 kg	25042 /8

Multi spices mix StarBaits

Mix containing selected lactic and vegetable proteins plus a number of spices loved by carp. Performance can be increased by adding flavours, essential oils (including garlic, black pepper), complex oils (Standard spice, Indian spice) and Star Baits Spice appetite stimulator.

	Ref.
1 kg	25071 /10
2,5 kg	25072 /8

Multi fruits mix StarBaits

Protein mix with a distinctive fruit flavour, it can be used with Star Baits fruit flavours (2-5ml per 500g) and/or Multi-fruits, chocolate/orange complex oils as well as Star Baits Fruit or Sweet appetite stimulators. Essential oils can be used, including orange, mandarin, coriander, fennel, bergamot and cinnamon.

	Ref.
1 kg	25061 /10
2,5 kg	25062 /8

> Flavours

These flavours combine a natural taste as well as smell. All these flavours are highly concentrated (1:1,000) so we recommend only 3-5ml per 500gm of dry mix. They can also be used to flavour groundbaits, seeds/particles and even neutral boilies that can be soaked with one or two ml of flavour and shaken in a plastic bag. The star Baits range includes 31 different tastes and smells, all thoroughly field-tested across Europe-guaranteed to get results.

> Essential Oils

Often obtained by distilling, these natural plant and fruit extracts work differently in water. Since they have a lower density than water, they are released from the bait and disperse reaching all layers of the water. These highly concentrated natural products must be used sparingly and kept out of the reach of children. Available in 20ml bottles.

> Complex Oils

Available in 150ml white bottles, these complex oils contain highly digestible oils, naturally rich in acids necessary for carp health, growth and reproduction. These oils are flavoured with natural products producing a range of attractive oils, forming an attractive smelling cloud in the water to guide the fish to your baited area. Use them as a flavour (up to 10ml per 500g of dry mix), a soaking oil or to flavour neutral baits (neutral boilies, seeds, groundbait etc.).

> Appetite stimulators

Sweet

For all flavours including Scopex, Caramel, Honey and complex oils including Double Vanilla, Chocolate/Orange and Helliip.

Spice

For all flavours including Indian spice, Standard spice, Black pepper, Garlic

> Sweeteners

Strong Natural Sugar

This additive contains natural sweeteners with an intense taste. Use 1-2 teaspoons per 500g of mix to give your boilies a boost, increasing their attraction. Can be successfully used with all types of mix, including Fish Meal.

Mega sweetener

Liquid sweetener from a combination of natural sugars and an intense sweetener. Add to your ingredients (eggs) to improve the taste. Use 1-2ml per 500g to make boilies and 1 dessertspoon per 500g of seed/particles.

> Natural Attractants

This is a complete mix of appetising oils, extracts of animal products, soluble amino acids and vitamins. These electrically charged L-shaped amino acids ionise in the water, sending out a chemical message picked up by the fish. Another important feature of this product is that it is heat-stable, which means it retains its qualities after boiling. Available in 100ml and 250ml bottles, use 20-30ml per 500g (mix with eggs) to give your baits a boost. Can be used whatever mix or flavour selected

Emulsifiers

Widely used in the farming industry, this "molecule buster" as it's known, separates oily acid molecules using hydrophobic (water-repellent) and hydrophilic (absorbent) elements to help release the attractants found in oil-based flavours into cold water (essential oils and complex oils). Available in 100ml bottles. Use 2-5ml per 500g mixed with eggs to boost your liquid additives.

Starmino

Solution containing L-shaped amino acids using ionisation to increase the appeal of your boilies.

Bottle	Ref.

Krill extract

Derived from specially selected ingredients, this krill extract will boost the attraction and taste of your bait. Its characteristic smell and solubility will help the fish locate your boilies. Rich in amino acids and vitamins, and with a strong taste, this product is particularly recommended for making your baits stand out and aiding digestion. Recommended for all uses, particularly for hard fish waters and pressured fish. Available in 200g tubs. Use 1-2 teaspoons per 500g of dry mix.

Pot	Ref.
200 g	44312

Squid powder

Derived from selected squid meal, squid powder is naturally rich in amino acids and vitamins. Add 1-2 dessertspoons/500 g of mix to give your baits a boost

Pot	Ref.
200 g	02063

Squid extract

High quality squid meal, naturally rich in amino acids and vitamins. Fish are likely to identify this as a potential source of natural food. 100% soluble and highly palatable, it is excellent in waters naturally rich in food as well as in cold waters. Ideal used with fish meal mix. Use 1 teaspoon per 500 g of mix.

Pot	Ref.
60 g	21460

Shrimp powder

Derived from shrimp flesh (no carapace), our shrimp powder is very rich in amino acids and can be used with all types of mixes. Use 1 teaspoon per 500g of mix. Add to the eggs and not to the mix to prevent flotation problems. Perfect for big fish!

Pot	Ref.
200 g	25787

Bétaine complexe

Betaine is a derivative of amino acid, boasting high nutritional benefits and impressive powers of attraction. Found in natural food, it disperses in water and can be sensed by carp thanks to chemo-sensorial cells, and identified as a potential source of natural food. Identification is boosted when betaine is combined in a complex with other chemical compounds. Its attraction is enhanced when dispersal takes place in synergy with these different compounds. Use a maximum of one teaspoon per 500 g of dry mix. BETAINE COMPLEX will dramatically increase the attraction of your bait.

Pot	Ref.
50 g	25784 /5

Digest +

Today's highly prized big fish are often quite old, and their metabolism has often slowed right down. This means to attract them you need to present them with food they can easily digest. The PERFORMANCE BAITs range introduces DIGEST+, a high quality complex specially formulated to help improve digestion. Used as directed (2 teaspoons per kg of dry mix), you'll be guaranteed a few takes over a 2/3 day session... and a few surprises.

Pot	Ref.
50 g	25783 /5

Soluble fish protein extract

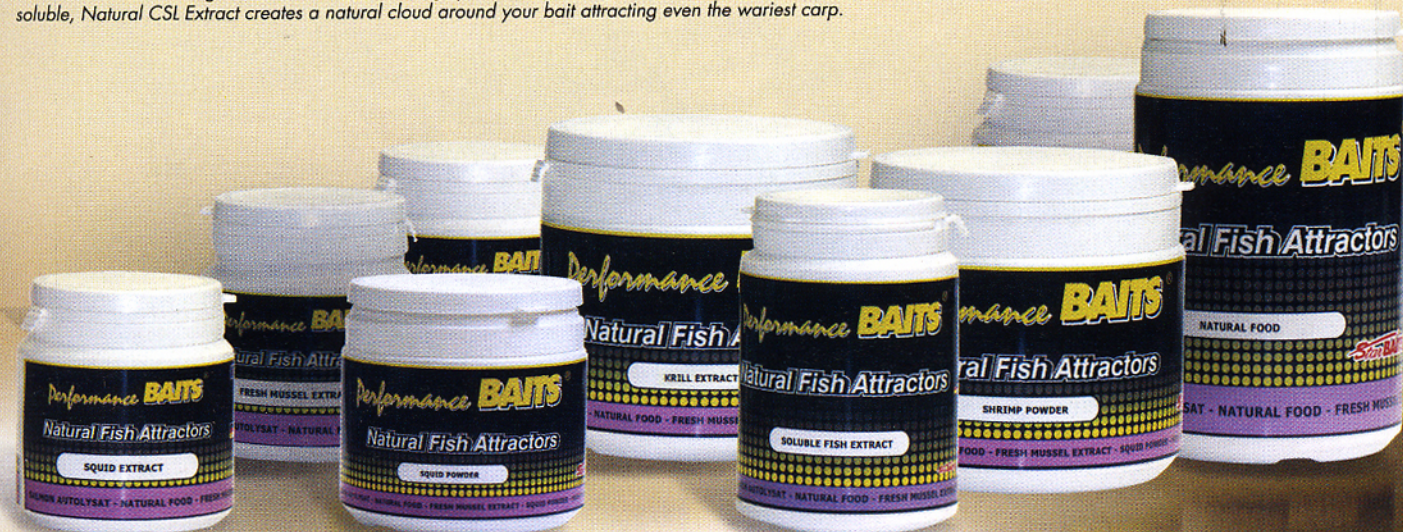

This soluble fish protein extract boasts all the features of a top of the range product. 95% soluble, this additive achieves amazing dispersal, mainly attracting big fish. The fact that it is 90% digestible is a major advantage for big fish as it makes bait easy to absorb. These features will boost your chances, particularly for cold winter fishing. Use 1-2 dessertspoons per kg whatever your mix.

Pot	Ref.
100 g	29112

Natural CSL Extract

Recommended for fishing in warm conditions, this highly viscous liquor is great for increasing the attraction of your baits. 100% water-soluble, Natural CSL Extract creates a natural cloud around your bait attracting even the wariest carp.

Pot	Ref.
200g	33991

Balanced Hooks

These new generation baits have proved their worth during extensive field tests particularly on hard fished waters with educated fish. These baits are 'Boosted' with attractants to compliment there low density making a perfect genuine balanced bait. These baillies are also tough enough to withstand the attentions of unwanted small fish and crays.

Long Life Boilies

Instant Frenzy is a soft palatable boilie concept manufactured using the finest fish meals in conjunction with natural fruit extracts and concentrates giving the carp a highly nutritional food source. Due to the selected combinations of vitamins, amino acids and betaine compounds the Instant Frenzy has shown in lengthy field testing to be a good all year round bait even at the lowest of temperatures. During the tests many large carp were caught showing that Instant Frenzy seemed to be highly attractive to bigger carps. Heavy baiting campaigns on pressured waters showed excellent results with some very impressive catch rates being had.

Long Life Boilies

SK 30 has been formulated using a stringent selection of the highest quality heat resistant fish meals, soluble fish proteins and marine extracts inparticularly squid and krill extracts. As SK 30 has a soft palatable, self coloured appearance it enables high levels of leakeage from the soluble proteins and amino compounds making it extremely attractive to fish. SK 30 has balanced levels of natural oils which help rapid effective digestability once consumed, this promotes heavier feeding situations and healthy fish. SK 30 has shown during testing to have extraordinary results during heavy baiting, lending itself to pre baiting campaigns.

Long Life Boilies

This year, we are very happy to introduce a new boilie to the famous « Performance Concept » range - the Omega Fish Boilie ! With all the same top-quality ingredients as the other boilie from the « Performance Concept » range, the Omega Fish was formulated to meet the expectations of serious fishermen, who want success even when fishing for big carp in waters with a lot of natural food. This boilie is very rich in fish based ingredients, betaine, amino acid, vitamins, which we have reinforced using both an attracter and a powerful natural appetite stimulator, which the carp won't be able to resist. The intense sweet and salty flavours create a powerful distinctive taste in the fish's mouth, which will lead the carp back to your swim and will make it look for your boilie only !

Balanced Hooks

These new generation baits have proved their worth during extensive field tests particularly on hard fished waters with educated fish. These baits are Boosted with attractants to compliment there low density making a perfect genuine balanced bait. These boilies are also tough enough to withstand the attentions of unwanted small fish and crays.

Long Life Boilies

White Fish Halibut Pellet is one of the new breed of Performance Concept boilies developed to provide carp with all their nutritional needs. Only the highest grade natural ingredients have been used with no artificial colourings or flavours.

White Fish Halibut boilies have been formulated around the high levels of micro pellet and various different water soluble fish meals, oils and fish derivatives creating a bait which will enhance a long term baiting programme and increase fish growth encouraging the carp to be dependant on this feed as a prominent food source. The boilie is high in shellfish extracts, salts and various minerals matched exclusively with low temperature controlled fish meals and the superb extracts sourced from the Halibut meal to create a high protein content winterised boilie with long term uses.

Dip Attractor

White Fish Halibut Pellet dip has all the same attracters and additives that go into both the boilie and the method mix. It has been formulated to give the baits that added attraction level needed to give a stronger food signal and can be used as a dip or as a additive for the method mix. This dip also works well when introduced to the lake within a PVA bag to give a food signal without the introduction of feed making your hookbait easily found.

200 ml	63211 /6
--------	----------

Frozen Boilies

Frozen White Fish Halibut Pellet boilies offer the exact same bait formulations as the long life version but giving you the added benefits of a high leakage bait with superb freshness gained from the blast freezing process. This makes this the perfect boilie for a long term baiting strategy. Remember that by introducing this bait to various areas of the lake prior to targeting the chosen fishing spots the carp will feed more intensely over a longer term.

Long Life Boilies

Tiger Sugar Crush boilies offer the exact same bait formulations as the long life version but giving you the added benefits of a high leakage bait with superb freshness gained from the blast freezing process. In the field tests it was often seen that Tiger Sugar Crush boilies often produced visits to the bank of the larger residents within the lake, Tiger Sugar crush boillie is one of the new breed of Performance Concept boilies developed to provide carp with all their nutritional needs. Only the highest grade natural ingredients have been used with no artificial colourings or flavours. The Tiger Sugar Crush boillie has taken all the positive fish attraction from the ultimate carp bait, the TIGER NUT. By formulating a boillie containing a ground compound of Tiger nut, Natural sugars, ground nut flours, Tiger nut oils, corn derivatives and bird foods, a versatile nut/bird food boillie has been created full of sweet nut attraction. Some big carp have had there picture took due to Tiger Sugar Crush freezer bait.

Long Life Boilies

Hempy Crush is one of the new breed of Performance Concept boilies developed to provide carp with all their nutritional needs. Only the highest grade natural ingredients have been used with no artificial colourings or flavours. Its of no surprise how powerful the attraction levels of hemp seed can be over carp often creating a total preoccupation for the little black seeds over and above anything else. By establishing a concept boilie incorporating all the benefits of Hemp seed and other varieties of hemp ingredients from flours to hemp oils and coupled with different bird food and corn ingredients, we have been able to compose a boilie with a subtle palatability which once eaten can create a preoccupied feeding response. Hempy Hempy Crush gives you the power of hemp in a balanced food package irresistible to the carp.

A WHOLE NEW CONCEPT ! This new type of boilie can be used all year round. They are easily digestible due to their high proportion of oily seeds and have large particles helping dispersal in the water. The richness of the ingredients as well as their effectiveness in water makes them a fantastic addition to any fishing situation. Used by themselves, or with all types of seed, they provide the key to some great catches.

Team **StarBAITS**

> Seedy Crush

A WHOLE NEW CONCEPT ! These new boilies are coarse textured, designed to aid digestion and stimulate feeding. Rich in large particles (60% seed) for rapid dispersal of additives in the water. Bait is quicker to detect, with a crushed appearance designed to stimulate feeding. With no artificial flavours, these new generation baits draw on the attractants naturally present in the ingredients and seeds used. Particularly good when used in conjunction with particle feed. Used all year round, the crushed seed range has already landed some big fish.

Birdy Seed

Developed from Bird Seed, this new type of boilie is high in essential oils and other attractants such as honey, waterfleas and liver extract. Rolled to provide a coarse texture, they work well in both summer and winter on all types of water.

CSL

This boilies is easily digestible due to their large particles and their high proportion of maize flour. This flour has gone through a partial enzymatic degradation : C S L flour. The CSL Boilie attracts fish that are used to feeding on seeds. Very effective on big wary carp !

> Xtra Balls

Today Performance Baits are renowned in the bait world for quality, attraction and the results they produce, in fact the attraction is so strong to fish of all kinds that this can be a problem at times. When targeting carp in multi-species venues you can find yourself continually un-hooking "nuisance" fish. With Xtra Balls that problem is taken away as anything that can "mouth" one of these hookbaits is defiantly worth catching. Also a must if targeting cats, try two if you dare!

> Boilie Booster

These highly concentrated flavours have been developed to boost the attraction of your hookbait (boilies) and can be used on PVA. They will make your bait stand out for a minimum of 12 hours, making them easier for fish to detect. Unlike classic flavours, these additives are partially soluble, which means you can obtain 2 types of diffusion with the same product. Comes in bottle with pipette.

For fish based :	Bottle	Ref.

> Pellets Performance Baits

Pellets Ø 20mm

These pellets slowly dissolve in the water forming a carpet of fine particles around your hookbait, ideal to keep carp in your swim for longer. Perfect for encouraging a frenzy of small fish to arouse the curiosity of carp, these high density pellets can easily be used at a distance, in very deep waters and on rivers. An excellent choice, particularly when carp aren't feeding heavily and the use of PVA bags is THE method.

2 Hemp	20 mm	29563

Pellets CSL

Developed from maize flour with a partially enzymatic breakdown, CSL pellets are especially effective when used with seeds such as maize or lupins for short-session fishing.

They are 100 per cent water soluble and are very effective all year round.

Seedy Pellets Maize

Made from seed particles, these pellets will dissolve and form a highly attractive carpet of particles around your swim. The high seed content promotes feeding and can be used for heavy groundbaiting.

Pellets Glue

Made from seeds, these pellets will dissolve and form a highly attractive carpet of particles around your swim. The high seed content promotes feeding and can be used for heavy groundbaiting.

400 g	-	25911 /10

Donuts

These pellets, rich in attractants, are pre-drilled making them easier to use as a hookbait or on PVA stringers. The perfect bait for fishing as a single hookbait, particularly in difficult conditions where boilies have been done to death. Can also be an ideal bait where bait restrictions are a problem.

High Oil Pellets

Rich in vitamin and trace-elements, high oil pellets contain proteins and fish oils carefully selected for their richness and unsaturated fatty acids.

Very dense, they can be used in deep lakes as well as rivers.

Their long dissolve time (8-10 hours) will allow you to create a constant attraction in your swim. They can also be hair-rigged and used with pop-ups to create snowman presentation..
