SureCatch®

HOOKS

Special Features

SureCatch treble hooks are all design, engineered and tested to achieve world class standard. Each and individual hooks are all technologically carved with high carbon and extreme strong weld. All these gives SureCatch hooks the extreme toughness and durability to handle all rigid fishing condition.

With our hooks build using super fine wire, you can guarantee that it will definitely give quick & easy penetration, leaving only a small opening. In addition to that, all SureCatch hooks are chemically sharpened to equip the hook with razor sharpness. When you add finest quality, best material and high notch engineering technology to a hook, you'll get SureCatch, world class, fishing hooks.

HOOK REMOVER

**BIG or SMALL fish,
it will do its job as well**

- ▶ Instant hassle free hook removing
- ▶ Great for Toothy Game Fish

**RE-STOCK
NPA**

2 Simple Steps

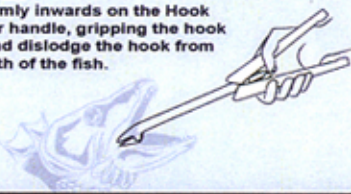

Hook Removing action

Step 1:
Place Hook Remover into
the mouth of the fish,
without pulling the trigger
handle.

Step 2:

Press firmly inwards on the Hook
Remover handle, gripping the hook
firmly and dislodge the hook from
the mouth of the fish.

Hook removing has never been easier

The SureCatch hook remover is simply a hassle free tool to work with. It helps you to unhook any hook from game fish easily without getting yourself hurt in the process of placing your hand near the mouth of the fish while removing the hook.

With its small mouth piece and long neck, SureCatch hook remover can easily reach and remove the hook of any size from fishes that you've caught.

FLEXIBLE

How to fillet your fish

1

Hold the head of the fish steady on a strong board with the back of the fish towards you.

Make an incision through the back of the backbone. Turn the blade so that it is running along the backbone.

2

Steady the fish by placing your left hand along the fillet as shown.

Firmly glide the blade along the backbone towards the tail.

3

Turn the fish over and repeat the procedure to remove the other fillet.

4

To remove the rib bones and cavity lining, make an incision under the bones at the top of the fillet. In a single action slide the blade of the knife in the direction of the bones and gently lift to make a clean cut under the rib bones. Trim off the cavity lining.
